Project manager
EURNEX

## EURNEX，the EUropean rail Research Network of Excellence

## Project duration

24 months (01/09/2023-31/08/2025)

## Budget

$\approx 1.30 \mathrm{M} €(1299750 €)$

## Consortium

9 Partners

## Project structure

6 Work Packages (4 technical + 2 transversal)

## ESEP4Freight - Main objectives

1. Bringing together a large number of actors of the European logistics system to identify their information needs
2. Creating, integrating and validating a set of web-based information services integrated in an openaccess web platform
3. Proposing recommendations to adapt the current contractual and legal framework in intermodal transport to the needs of the different actors

## ESEP4Freight - Approach

## Static

 information with update possibilities

- Interactive map: two levels of information foreseen (Europe-wide and specific areas or corridors)

- Route viewer: visualization of connections based on selected KPIs
- $\mathbf{C O}_{2}$ calculator: assessment of $\mathrm{CO}_{2}$ emissions for specific routes and products
- Schedule viewer: visualization of timetables from major transport operators
- Contract toolbox: compilation of standard/harmonized contracts and information about legal framework
- Smart contracts: specifications and proof-of-concept for an informative and a contractual layer for facilitating the use of smart contracts
- Matchmaking tool: compilation of companies profiles to facilitate the match of offer and demand of freight transport services
